Alberto Guzman-Alvarez; alg223@pitt.edu

Project Title: Deep learning for investigating causal effects with high-dimensional data: analytic tools and applications to educational interventions.

Pre-Dissertation Requirements:

December 5, 2019	Coursework Completed
June 29, 2020	Milestone 1: Preliminary Examination
	Milestone 2: Pre-Dissertation Research Project
December 14, 2020	Milestone 3: Doctoral Comprehensive-Examination (anticipated)
	Milestone 4: Dissertation Proposal Defense (anticipated)

Timeline for Other Dissertation-Related Activities:

Oct. 2020-Feb. 2021	Analysis of CommonApp intervention (Study 3)
Dec. 2020	Finalize draft of propensity score manuscript (Study 1)
Jan. 2021	Receive CommonApp intervention data (Study 3)
Feb. 2021	Submit SREE conference proposal for propensity score study (Study 1)
Mar. 2021	Submit propensity score manuscript to JEBS (Study 1)
Feb.-Apr. 2021	Analysis of causal-mediation study (Study 2)
June 2021	Beginning of NAEd/Spencer Fellowship
June 2021	Revise manuscript for propensity score study (Study 1)
June 2021	Package propensity score code into an R package (Study 1)
Jul. 2021	Submit AERA conference proposal (Study 2 & 3)
June-Oct. 2021	Draft manuscript for causal-mediation study (Study 2)
Aug.-Nov. 20201	Draft manuscript for CommonApp intervention (Study 3)
Sep. 2021	Present at SREE conference
Dec. 2021	Revise manuscript for causal-mediation study (Study 2)
Jan. 2022	Revise manuscript for CommonApp intervention (Study 3)
Mar. 2022	Send dissertation to committee members
Apr. 2022	Present at AERA conference
Apr. 2022	Milestone 5: Dissertation Defense
May 2022	Complete dissertation revisions and submit
